

Building A Modern CESU Reporting System

Roland Duhaime

University of Rhode Island

June 12, 2013

Random Insights / Goals

- People don't like to write long reports
 - Create a system that allows for the entry of milestone descriptions throughout the project.
 - Final report synthesis.
 - Make it fun and efficient for the researchers!
- Connecting people, activity, tools. Keep CESU offices updated on what is happening.

Big Thinkers

O.K. We've all heard about it -- on the news, in blogs and even in some comedy routines -- the United States is getting very close to some kind of big cliff. But this isn't just some ordinary cliff, it's one that URI's College of Business Dean Mark Higgins

is watching very closely. "It's that famous Fiscal Cliff," said Dean Higgins, who also holds the Alfred J. Verrecchia-Hasbro Inc. Leadership Chair in Business. This is the popular term being used to...

Now Playing

The Stone family is enjoying their first Thanksgiving in the first completed home in the South County Habitat for Humanity neighborhood on the University of Rhode Island campus. The home was sponsored by the URI community, which raised \$84,000 to build the house, and President David M. Dooley and his wife, the Rev. Lynn Baker-Dooley, led the dedication festivities in September.

'Webform: Roland Webform block'

Home » Administration » Structure » Blocks

Block title

Override the default title for the block. Use <none> to display no title, or leave blank to use the default block title.

Display mode

- Form only
- Full node
- Teaser

The display mode determines how much of the webform to show within the block.

Show all webform pages in block

By default multi-page webforms redirect to the node page for all pages after the first one. If checked, all pages will be shown in the block instead.

REGION SETTINGS

Specify in which themes and regions this block is displayed.

Bartik (default theme)

Content

Zen

- None -

Seven (administration theme)

- None -

Alpha

- None -

Visibility settings

Pages

Restricted to certain pages

Content types

Not restricted

Roles

Not restricted

Users

Not customizable

Show block on specific pages

- All pages except those listed
- Only the listed pages

node/4

Specify pages by using their paths. Enter one path per line. The "*" character is a wildcard. Example paths are *blog* for the blog page and *blog/** for every personal blog. *<front>* is the front page.

The North Atlantic Coast Cooperative Ecosystem Studies Unit (CESU) engages federal agency scientists and managers, in collaboration with academic and other non-federal scientists and students, to understand how fundamental ecosystem functions and processes are affected by increasing urban development, climate change, and other stressors, and then to devise management strategies for preserving and restoring coastal ecosystems, cultural resources, and maritime heritage.

- Federal agencies acquire information to make science-based decisions
- Research opportunities for students, faculty and researchers
- Collaborative opportunities between agency and non-federal scientists
- Educational opportunities for students and agency managers

The North Atlantic Coast CESU is part of a **National Network of 17 regional CESUs** encompassing the Nation. Over 200 academic institutions and more than 50 other non-federal partners, along with 13 federal agencies are associated with the **National CESU Network**. This Network is among the largest of collaborative research partnerships addressing natural and cultural resource stewardship in the United States. The CESU Network provides high quality science, usable knowledge for resource managers, responsive technical assistance, education opportunities, and cost-effective research.

CESU Project Reporting | CESU Project R...

of the European badger, *Meles meles*. Ph.D. dissertation, University of Oxford, Oxford, United Kingdom.

Posters and Oral Presentations

List all poster and oral presentations that were given at professional meetings based on this project (including title, date, and name of conference where presented). Please follow this format: (Conference Paper or Poster): Harris,R.B. 2012. Home-range analysis using radio-tracking data: a review of problems and techniques particularly as applied to the study of mammals. Paper (Poster) Presented at Annual Meeting of the American Society of Mammalogists, Lubbock, TX.

Professional Citations

List the citations for all publications based on this project, including both publications in peer-reviewed journals and any technical reports. Please follow this format: (Journal Paper): Christensen, N. D., and J. E. 2003. Ecology of cranberry bogs: a case study. *Ecology* 59:1147–1167, 1178–1187. (Chapter in a Book): Cran, B., C. Boy, and L. Shi. 1911. Native forest birds of Guam. Pages 4–8 in T. Wu and L. Lee, editors. *Flora and fauna of Guam*. 2nd edition. Tell Books, Ace, Ohio.

Other Products

Please enter citations for all your project outputs and products (e.g., publications, conference presentations/posters, degrees conferred, websites, reports, other information resources)

Supporting Project Files

Please upload any project documentation or data files that may help with reporting. You may include multiple files inside a zipfile but the file must be under 8 megabytes in size.

Comments

Please enter any additional comments that you may have that will help us with reporting.
