

JOIN THE NAC CESU EXPERTS DATABASE!

- Cooperative Ecosystem Studies Units (CESUs) are partnerships between federal agencies and non-federal partners that streamline funding for research, technical assistance, and education projects supporting resource management.
- Joining the Experts Database connects your expertise with agencies ready to fund projects in all natural and cultural resource fields.
- Users can search area of expertise, CV keywords, and geographic location.
- Early-career professionals and anyone looking to work with participating federal agencies will benefit from joining the database.
- Enrolling as an expert fosters faster project development and encourages bidirectional communication between non-federal partners and federal scientists and staff.

What is the NAC CESU?

The North Atlantic Coast Cooperative Ecosystem Studies Unit (NAC CESU) is one of a national network of 17 CESUs throughout the U.S. The network engages academic and other non-federal researchers and students, in collaboration with federal agency scientists and managers, to address natural and cultural resource management issues at multiple scales and in an ecosystem context.
